

ACTON POLICE DEPARTMENT
371 MAIN STREET
ACTON, MA 01720

Chief Frank J. Widmayer

(978)264-9638

NOTICE

WINTER PARKING BAN
FOR ALL PUBLIC ROADS

November 1st – April 1st
1:00AM – 6:00AM

Violators may be towed at owners expense.

Winter Maintenance

***Town of Acton
Highway Department
(978) 264-9624***

Acton's Storm Strategy

The Town of Acton Highway Department has over 100 miles of roads to maintain. In an effort to make the snow season as safe as possible, we offer the following tips and information. Please remember that each storm is different so our strategy must be adjusted accordingly to achieve the best results.

The Town of Acton is not responsible for the maintenance of Route 2, Route 2A, or Route 111. These roads are maintained by the State Highway Department. Questions or concerns regarding these roads should be directed to the District 3 Office of the Massachusetts Highway Department at (508) 754-7204.

The Highway Department is devoted to providing its residents with dependable snow removal operations in the least amount of time. With your cooperation we will all benefit during the snow season.

When The Storm Begins

When a snowstorm begins the Department responds by treating all roads with deicing chemicals. Treating the road surfaces serves two purposes. It prevents snow and ice from bonding to the surface and keeps traffic flowing. Treating the roads takes approximately 2 ½ - 3 hours. Please remember that our crews have to travel on snow covered, slippery untreated roads to get here at any hour of the day or night. Please be patient as the crews will be out as soon as possible to begin the operations.

During The Storm

Plowing operations begin when there is an accumulation of 3 to 5 inches of snow on road surfaces. Depending upon the severity of the storm, Town forces are assisted by hired contractors to expedite the process of snow removal. Each vehicle is assigned to a pre-determined route and will remain there until the storm subsides unless an emergency occurs that requires reassignment of equipment from one location to another. The main objective is to keep all roads passable during the storm. Unfortunately, it is not possible to keep the roads free of snow without filling in many driveways; therefore, when you clean the end of your driveway deposit the excess snow to the downstream side of your driveway. This will minimize the redeposit of snow into the cleared opening when the plow makes its next pass

Please do not shovel, plow or blow snow or ice into the roadway. It is not only illegal, but can be a serious traffic hazard. If you have a private contractor plowing your driveway please make sure to remind them of this as you will be held responsible for their actions.

Once the snow has stopped, all roads are scraped and widened sufficiently in anticipation of future storms and for public safety.

Following The Storm

After plowing is completed roads are given a final treatment of deicing chemical. In the days following a storm, scraping and treating of roads continues depending upon weather forecasts. If colder weather is forecast, streets must be scraped of snow and slush to prevent icing of the surface when the temperature drops and also to widen the road edge so that drainage structures are exposed if the temperatures rise and melting occurs. As time allows, snow is removed from intersections where sight distance is a concern.

Sidewalks

Normally, sidewalks are plowed during the storm and scraped in the following days if needed. Sidewalks in the school zones are given first priority, after which all connector sidewalks are plowed. After storms of above average nature, sidewalk snow blowers are needed to clear the heavy accumulations. This is a slow process and in many instances takes several days to complete. We ask that you do not block sidewalks with snow shoveled or plowed from your driveway.

Winter Parking Ban

Residents are reminded that a winter parking ban is in effect from November 1 until April 1. On street parking is not allowed between the hours of 1:00 a.m. and 6:00 a.m. Vehicles that are illegally parked will be ticketed and towed at the owner's expense if they interfere with snow removal operations. Your cooperation is greatly appreciated.

Fire Hydrants

Fire hydrants are under the control of the Acton Water District. The Water District asks residents with hydrants in front of or near their property to please clear the snow away from the area so that in an emergency the hydrant will be accessible. Questions regarding snow removal near hydrants should be directed to the Acton Water District at (978) 263-9107.

Recycling and Trash Containers

If residents have private curbside pickup of recyclables or trash, please ensure that the containers do not interfere with snow removal efforts.

Sand and Salt

A mixture of sand and salt is available to residents (no contractors) at the designated area located behind the Highway Department at 14 Forest Road. Follow the signs to the area designated for residents. Please use caution while entering and exiting as vehicles and equipment are prevalent. Please bring your own shovel and container.

Town Right of Way

Homeowners should be aware that in most instances they do not own the land up to the edge of road pavement or sidewalk. The Town generally owns the land 8 feet from the road edge and at least 1 foot from the back of the sidewalk. There may be underground utilities within these areas and homeowners should be careful as to what they place in these areas. Trees, shrubbery, fences, lawn sprinkler systems or gardens within the right of way may be damaged during snow removal operations. The Town will not be responsible for damage to such items within the right of way.

Mailboxes and Basketball Nets

The Town of Acton does not replace or repair mailboxes or their posts. Mailboxes installed within the town right of way are placed at the owner's risk. The plow operators do not deliberately knock down or damage mailboxes. The primary cause of the loss is the weight of the snow being thrown off the plow. When installing a mailbox choose a suitable location.

If you are unsure, check with the postal carrier. After a substantial snowfall be sure to clean in front of the mailbox so you can receive deliveries. If the snow banks are too high to shovel, place a temporary box or a plastic pail beside the road until the snow has melted enough to allow access to the mailbox. Check the condition of your mailbox and post before the ground freezes and replace them if needed.

Basketball posts and nets that have been placed on the edge of the road and overhang areas to be plowed are another area of concern for operators. These have caused damage to Town vehicles and must be removed before the snow season begins. Again, the Town cannot be held responsible for damage to posts or backboards and will remove them if they interfere with snow removal operations.

Spring Repairs

Sometimes the grass strips and curbs along the roads are damaged while plowing. The Highway Department works to repair these areas as soon as possible; however other work that involves the safety of the public takes priority. It may take until mid summer to repair these areas. The repair of grass surfaces generally consists of raking out the ruts and seeding with a standard highway grass seed. If your landscaping needs are such that this is unacceptable, **you may choose to repair these areas on your own earlier in the spring.**

Street Sweeping

Part of the Highway Department's maintenance program involves cleaning the road surfaces and drains of the sand that was spread during the winter. The road surfaces and sidewalks are cleaned with mechanical sweepers during the spring months (end of March to the middle of June). The Highway Department first cleans the highly visible areas such as the town centers and the Isaac Davis Trail. The remainder of the town is divided into 6 sectors which are rotated annually in the cleaning cycle. Most roads are swept twice during this period to insure we are in compliance with environmental regulations that are in place to protect our wetlands and streams. The Highway crew does not rake sand from the grass adjacent to the roads. Residents, however, may rake the sand onto the road surface for pickup by the sweepers. **Do it early before the road is swept! Place the sand in a long row rather than a big pile. Do not mix lawn wastes, trash, tree limbs, etc in with the sand as it may damage the machinery. The operator will not remove such material, leaving an unsightly mess for you and your neighbors.**

The Highway Department takes considerable pride in Acton's clean, well maintained attractive streets. Your continued cooperation in making this happen is very much appreciated.
